Heco Container Terminal

Decongesting Dar Port, Accelerating Your Trade

TABLE OF CONTENTS

1.0 EXECUTIVE OVERVIEW: THE STRATEGIC NEXUS
- The Vision to Decongest and Accelerate Regional Trade

2.0 INFRASTRUCTURE & CAPACITY
- 72,250 SQM Operational Footprint
- TEU Holding & Simultaneous Verification Speed
- Certified On-Site Weighbridge Precision

3.0 CORE OPERATIONAL PILLARS
- Integrated ICD & Shunting Operations
- The One-Stop Customs & Regulatory Center
- Regional Transit Hub: Gateway to the Hinterland

4.0 SPECIALIZED CUSTOMS WAREHOUSING
- Bonded Storage & LCL Management
- FCL to LCL Stripping (Change of Status Expertise)

5.0 SPEED, SECURITY & PRECISION
- The TTT Benchmark: Optimizing Truck Turnaround
- Industrial-Grade Safety & Fire Suppression Systems
- 24/7 Digital Surveillance & Cargo Monitoring

6.0 THE HECO ADVANTAGE & CONCLUSION
- A 24/7/365 Operational Commitment
- Strategic Conclusion: Partnering for Growth

7.0 CONTACT INFORMATION

EXECUTIVE OVERVIEW:

THE STRATEGIC NEXUS

In the fast paced world of global logistics, time is the only currency that truly matters. HECO Container Terminal LTD (HECO ICD) was established as astrategic response to the logistical complexities of East African trade. Actingas the primary "pressure valve" for the Port of Dar es Salaam, we serve as a high capacity, technology driven extension of the maritime gateway.

Strategically located in the Vijibweni Industrial Area of Kigamboni a mere 6 kilometers from the Dar es Salaam Port HECO ICD is designed to bypass the traditional hurdles of port congestion and clearing delays.
By decentralizing logistics and moving the clearing process to our expansive 72,250 square meter terminal, we provide importers, exporters, and transit partners with a faster, more controlled environment to manage their global interests.

INFRASTRUCTURE & CAPACITY

Engineered for high volume throughput, our 72,250 SQM paved terminal ensures the Dar es Salaam corridor remains a fluid artery for regional trade.

- Scalable Storage: 4,500 TEU holding capacity to meet fluctuating market demands.
- Rapid Verification: Dedicated space for 120 TEUs to undergo simultaneous customs inspection, slashing idle time.
- Traffic Optimization: On site parking for 50 semi trailers keeps vehicles secure and off public roads.
- Certified Accuracy: A 100 ton WMA calibrated weighbridge ensures precision for every load.

CORE OPERATIONAL PILLARS

ICD & Shunting Excellence: Using a dedicated fleet of 50 trucks, we create a "conveyor belt" of cargo between the port and our facility, ensuring rapid decongestion and cargo availability.

Consolidated Customs: We provide a calm, efficient alternative to port side chaos. Our one stop center facilitates rapid customs and OGD verifications, ensuring all regulatory hurdles are cleared in one location.

Regional Connectivity: We serve as the primary gateway for transit cargo. Our expertise in international bonding ensures a smooth, administrative free journey to landlocked markets, including Zambia, DRC, Rwanda, Malawi, Burundi, and Uganda.

SPECIALIZED CUSTOMS WAREHOUSING

Beyond simple storage, HECO ICD operates 6,600 SQM of specialized, bonded warehousing designed for complex cargo requirements. We provide the infrastructure and technical expertise to handle:

- **Bonded Security**: A high security environment for goods awaiting final documentation, ensuring your assets are protected and compliant.
- **Professional LCL Management:** Tailored handling for consolidated cargo, allowing multiple consignees to clear their goods individually and efficiently.
- **FCL to LCL Stripping (Change of Status):** A signature HECO service. We provide the technical precision to "strip" Full Container Loads and convert them to LCL status offering importers the agility to break down large shipments for immediate distribution.

SPEED, SECURITY & PRECISION

At HECO, we believe that efficiency is driven by data. Every container and vehicle is tracked in real time to ensure your cargo moves safely and quickly.

- **Fast Truck Turnaround (TTT):** We value your time. Our system monitors every truck from the moment it enters our gate until it exits. By minimizing waiting times, we help transporters lower their costs and keep the supply chain moving.
- **Industrial Grade Safety:** To protect your investment, we have built a world class fire suppression system. This includes a massive 1,000,000 liter water reserve and high pressure industrial hydrants capable of responding to any emergency instantly.

- **24/7 Digital Surveillance:** Your cargo is under our watch every second. With a network of CCTV cameras and advanced digital monitoring, we provide a secure environment for your assets 24 hours a day, 365 days a year.

THE HECO ADVANTAGE :

STRATEGIC PARTNERSHIP

Global trade never stops, and neither does HECO. We operate 24 hours a day, 365 days a year ensuring your supply chain remains fluid through weekends, nights, and public holidays. Supported by our own fleet of heavy duty Reach Stackers, specialized Forklifts, and Shunting Trucks, we guarantee that your cargo is always moving, regardless of the calendar.

CONCLUSION

HECO Container Terminal LTD offers more than just space; we offer a competitive edge. By merging massive physical infrastructure with specialized services like cargo stripping and data driven efficiency, we turn logistical hurdles into business opportunities. We are dedicated to making the complexities of the Dar es Salaam port a thing of the past for our partners.
